

萬一遇上停電，雖然現在樓宇有裝設緊急照明系統，但安裝時往往因環境所限，造成部分地方或沒有足夠照明，大廈、商場或地鐵站均變成盲點重重、陷阱處處！如何能有效疏導人群呢？

Nowadays, modern buildings such as: shopping malls, subway systems or mega commercial building have back up lighting for people to evacuate in case power supply was suspended. But there are still full of blind spot that people may fall down or even get hurt.

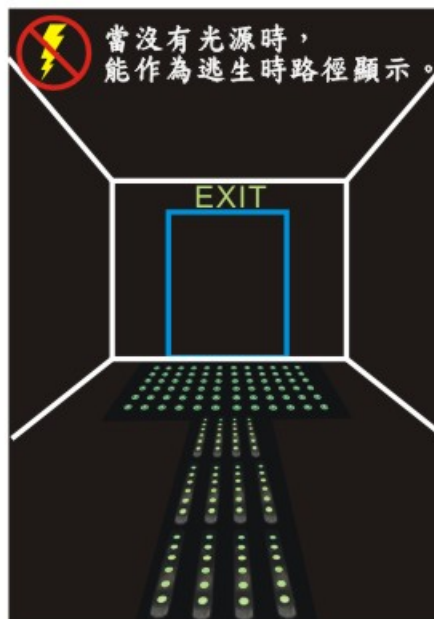

而夜光導行裝置利用日光或有燈光時段吸收光源，當沒有光源時，便會發出夜光色彩，使人們能清楚望見逃生道路。

Sunway Glow Cap Tactile System itself absorb light source and it will glow in dark environment for around an hour. Sunway Glow Cap Tactile System provide extra light source for people to evacuate when emergency happen.
